PROFILE

Cybersecurity professional with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT), specializing in web application security assessments and vulnerability identification. Skilled in manual security testing using Burp Suite, supported by automated assessment tools such as Acunetix and OpenVAS. Experienced in conducting security analysis, validating vulnerabilities, preparing detailed remediation reports, and performing retesting activities aligned with OWASP Top 10 methodologies. Strong foundation in networking, Linux, and security best practices with a commitment to improving application security and risk management.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science and Engineering	2021 – 2025
C.V. Raman Global University, Bhubaneswar, Odisha	CGPA: 6.66

All India Senior School Certificate Examination	2018 – 2020
Firayalal Public School, Ranchi, Jharkhand	62.3%

EXPERIENCE

VAPT Analyst <i>Logging Security Pvt. Ltd.</i>	Mar 2026 – Present
--	--------------------

- Performed vulnerability assessments and penetration testing for **10+ web applications**, identifying and validating security weaknesses across authentication, access control, and input validation mechanisms.
- Conducted reconnaissance, attack surface analysis, and manual security testing aligned with OWASP Top 10 methodologies.
- Prepared detailed vulnerability assessment reports including proof-of-concepts, risk analysis, and remediation recommendations.
- Collaborated with development teams during remediation and retesting activities to verify security fixes.
- Utilized tools such as Burp Suite, Nmap, Nessus, and Metasploit to support security assessments and validation activities.

Cyber Security Intern / Trainee <i>Hackerade, Ranchi, Jharkhand</i>	Sep 2025 – Feb 2026
---	---------------------

- Performed security analysis involving threat detection and vulnerability identification across networks and web applications.
- Conducted vulnerability assessments and security testing based on OWASP Top 10 using tools such as Burp Suite, Nessus, Vega, and Metasploit.
- Practiced bug hunting techniques including reconnaissance, manual testing, and validation of security issues.
- Analyzed logs and file systems to support incident investigation and security monitoring activities.
- Prepared structured security reports documenting findings, impact, and remediation recommendations.

Cyber Security Analyst Intern <i>Avira World, Ranchi, Jharkhand</i>	Feb 2025 – Apr 2025
---	---------------------

- Performed security analysis through log review and file system examination to support threat detection activities.
- Analyzed network traffic and security events using Wireshark to identify anomalous patterns.
- Assisted in vulnerability identification and basic risk assessment across internal systems.
- Supported security documentation and investigation workflows.

- Gained hands-on experience with embedded technologies and embedded programming using Keil uVision.
- Worked with LPC1768 microcontroller and peripherals including DHT11 sensors and RFID modules.
- Assisted in development, testing, and debugging of embedded applications for monitoring systems.

SKILLS

Cybersecurity	Security Analysis, Threat Detection, Vulnerability Identification, Bug Hunting, OWASP Top 10, MITRE ATT&CK
Tools	Wireshark, Nmap, Burp Suite, Metasploit, Nessus, Vega
Systems & Networking	Linux, TCP/IP, DNS, HTTP/S, Network Security Fundamentals
Programming & Databases	C, C++, Python, MySQL, Database Management

PROJECTS

Web Application Security Assessment

Performed manual security testing of business web applications using Burp Suite, identifying vulnerabilities related to authentication, access control, session management, and input validation. Utilized automated security assessment tools including Acunetix and OpenVAS to support vulnerability discovery and validation. Prepared detailed Burp Suite-based vulnerability reports documenting findings, risk impact, proof-of-concepts, and remediation recommendations, followed by retesting to verify implemented fixes.

Vulnerability Retesting and Validation

Verified remediation of previously identified security findings and documented residual risks through structured retesting procedures..

Human Risk Assessment

Analyzed human-centric security risks by reviewing organizational processes, communication channels, and security practices. Developed recommendations to strengthen security awareness and reduce exposure to social engineering threats.

CERTIFICATIONS

CEH – Hackerade, Ranchi, Jharkhand
Certified Network Security Practitioner – SecOps Group
Certified Social Engineering Defense Practitioner - SecOps Group
Diploma in Embedded Development
Switching, Routing, and Wireless Essentials – Cisco
